

BT ROUND

Quick Lock

**BEST
QUALITY**

**MADE IN
ITALY**

Tools with 2 cylindrical segments of 10mm, **highly aggressive for removing resins, adhesives, and paints.** They are also a good choice for grinding hard concrete. Do not use for grinding abrasive concrete. The BT Round series is a powerful and effective solution for removing coatings, adhesives, resins, and paints from concrete, both dry and wet.

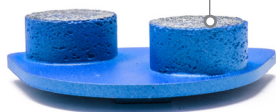

USE:

**FOR DRY REMOVAL OF
ADHESIVES AND RESINS
FROM CONCRETE.**

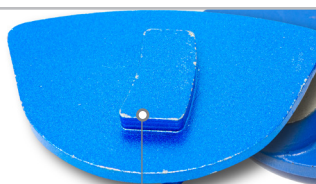

ADVANTAGES:

10mm Segments

Quick Lock coupling

To achieve optimal results in removing adhesives, resins, and paints, it is crucial not only to have the right equipment but also to carefully select the appropriate tools. Accurately identifying the most suitable instruments and products can be a challenge, even for the most experienced professionals.

RECOMMENDED MACHINES:

GRITS:

GRIT 30

OTHER AVAILABLE SIZES:

- Quick Lock diamond tools can be used on all tool holders from $\varnothing 140\text{mm}$ to $\varnothing 430\text{mm}$, making the operator's work easier by allowing the same tool line to be used across different machines.
- Diameters $\varnothing 100\text{mm}$ and $\varnothing 140\text{mm}$ are available with AS attachment.
- For the use of trapezoidal tools, a specific tool holder is required, available in sizes from $\varnothing 200\text{mm}$ to $\varnothing 430\text{mm}$.

Trapezoidal

$\varnothing 100\text{ mm} - \text{AS}$

$\varnothing 140\text{ mm} - \text{AS}$

$\varnothing 200\text{ mm} - \text{QA}$

$\varnothing 240\text{ mm} - \text{QA}$
