

CARBIDE SCRAPER

Quick Lock

**BEST
QUALITY**

**MADE IN
ITALY**

Quick Lock trapezoidal tungsten carbide abrasive tools, for quick and easy removal of gummy sealants, thick adhesives, and other elastomeric coatings.

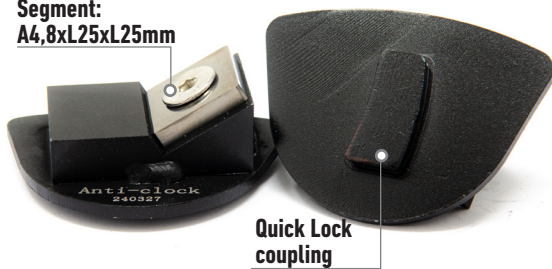

USE:

**DRY OR WET FOR THE REMOVAL OF
ADHESIVES AND RESINS
FROM CONCRETE.**

ADVANTAGES:

Segment:
A4,8xL25xL25mm

Quick Lock
coupling

A powerful and effective solution for removing thick and persistent coatings, including high-density resin coatings, adhesives, gummy sealants, and underlays from concrete surfaces.

Carbide Scrapers can be used both wet and dry, offering a cost-effective method for quickly removing resins, adhesives, and coatings.

To save on costs, the carbide blade can be replaced, and the Quick Lock attachment allows the Carbide Scraper tool to be used with all HG tool holders ranging from ø140mm to ø430mm.

RECOMMENDED MACHINES:

**BIG
GRINDERS**

**SMALL
GRINDERS**

**TOPS AND STAIRS
GRINDERS**

**PERIMETRAL
GRINDERS**

AVAILABLE VERSIONS:

Quick Lock Carbide Scraper tools are available in two different models:

- **Anti-clock system**
- **Clockwise system**

Designed for machines with right-hand or left-hand rotation systems.

MAIN FEATURES:

- **Versatile Compatibility:** Quick Lock tools can be used with all tool holders ranging from ø140mm to ø430mm, simplifying the operator's task by allowing the same tool line to be used with different machines.
- **Surface Protection:** Carbide Scrapers will not damage the underlying concrete, making them ideal for surfaces that will later be polished.
- **Effective Removal:** Easily removes thick adhesives, gummy sealants, and elastomeric coatings, ensuring a clean surface ready for further treatment.
