

EvoSHINE FLEXI

Diamond discs for grinding and polishing both new and old marbles. **They provide greater shine, color, and depth to the floor.** Extremely effective in removing deep stains, marks, and scratches, perfect for the restoration and professional polishing of marble, limestone, travertine, and other natural stones. **New flexible formula with increased durability.**

USE WITH WATER ON MARBLE AND STONE.

ADVANTAGES:

9mm thickness

Velcro backed for quick attach

Also ideal for polishing and restoring wavy surfaces thanks to the special flexible resin formula. During the polishing process, there is no need to use chemicals, simplifying the work and minimizing health risks for operators. With fewer steps, the EvoShine Flexi quickly achieves a high shine. It has a long lifespan, capable of polishing up to 1800m². It is an environmentally friendly and healthy system, with no dust pollution during use, allowing savings on consumables, time, and labor compared to traditional polishing methods. The EvoShine Flexi has a design designed to ensure extraordinary and long-lasting shine.

New FORMULA
which makes it
FLEXIBLE
