

EvoSHINE

BEST
QUALITY

MADE IN
ITALY

New diamond discs ideal for marble, limestone, travertine, and natural stones. **They provide greater shine, color, and depth to the floor.** Thanks to their **chamfered edges**, EvoShine discs prove to be the best tool for grinding and polishing surfaces with unevenness and imperfections. **Featuring a new flexible formula with increased durability.**

USE WITH WATER ON MARBLE AND STONE.

ADVANTAGES:

8mm thickness

chamfered edge

Velcro backed for quick attach

Thanks to the chamfered edge, EvoShine discs are ideal for restoration and polishing work on floorings with unevenness and imperfections. With fewer steps, EvoShine quickly achieves a high shine. It has a long lifespan, capable of polishing up to 1800m². It is an environmentally friendly and healthy tool, with no dust pollution during use. During the polishing process, there is no need to use chemicals, simplifying the work and minimizing health risks for operators. It allows savings on consumables, time, and labor compared to traditional polishing methods. The flexible resin base is perfect for polishing wavy surfaces. EvoShine has a unique shape that ensures extraordinary and long-lasting shine.

New FORMULA
which makes it
FLEXIBLE

RECOMMENDED MACHINES:

FLOOR GRINDING MACHINES

SINGLE DISC MACHINES

STRENGTHS:

- Completely **made in Italy**, this product features an innovative formula that ensures better performance and durability.
- Grits #30 - #60 - #120 are crafted with rigid resin to guarantee enhanced cutting and material removal properties.
- Grits #220 - #400 - #800 - #1500 are manufactured with a special flexible resin to provide unparalleled and uniform polishing across the entire surface, even on wavy surfaces.
