## TECNOLOGY:

Jumpy Orange are the perfect combination of resin with abrasive powders and superior diamond powder. Specific formulations developed to optimize the polishing of different materials.

The tooling design with sloping edges effectively prevents bumps and breakage. It also reduces the effort of the machine to slide the tool over the obstacle and continue with the polishing work.

100% effective structured abrasives from the beginning. The linear micro-structure defined in the upper part of the product, allows a perfect job from the beginning, no need to prepare or open the tool previously.
